17 SlashPRO® Slash Resistant Long Johns | **200102**

SlashPRO® Slash Resistant Clothing

The risk of being slashed with an edged weapon is a harsh reality for those working for homeland security agencies, prisons and correctional facilities and within the private security sector.

Slash related injuries can often lead to rapid blood loss, subsequent shock and ultimately death, this is not to mention any long-term psychological trauma inflicted in case the injured person is surviving such assault.

There is no question about it, the number of assaults on frontline professionals are on the rise – so it pays to protect staff against the very worst-case scenarios. **SlashPRO® Slash Resistant Clothing** effectively helps to reduce the risks of slash related injuries. All garments offer BS EN 388:2016 Blade Cut Resistance Level E or Level 5 (the highest possible) based on the previous EN 388:2003 standard.

Please note, based on extensive research we know that more or less 100% of attackers with a knife will most likely aim to stab the other person.

Why is SlashPRO® Clothing So Important?

- In March 2023 there were just over **40,000 assaults on police officers** in England and Wales (including British Transport Police). Of which 29,308 were crimes of “assault without injury on a constable”. 11,022 crimes of “assault with injury on a constable” were recorded across all forces.
- According to FBI statistics, **43,649** officers were assaulted while performing their duties in 2021. Of these, 2.3% (1,000 officers) were **attacked with knives** or other cutting instruments.
- According to Safety in Custody Statistics, England and Wales: In the 12 months to June 2023, the rate of assaults on prison staff was 96 assaults per 1,000 prisoners (**7,908 assaults on staff**), up 1% from the 12 months to June 2022. In the latest quarter the number of assaults on staff increased by 13% to 2,222 incidents.

However, due to the motions and movements of both parties, the majority of wounds are in fact slashing wounds.

Many professionals incl medical staff conclude and/or report a ‘knife wound’ as ‘stab wound’. This is unfortunately not the case and further education is needed. Ian Horsfall and Mathew Arnold, of the Impact and Armour Group within the Department of Engineering and Applied Science at Cranfield University (Defence Academy of the United Kingdom) wrote a comprehensive piece on ‘Protecting From Slash Knife Attacks’. A clear statement in this article reads:

“A retrospective survey of hospital admissions data that contributed to the development of the standard suggested that 63 % of wounds attributable to sharp edged weapons were slash events.”

Robert Kaiser, CEO
PPSS Group

About Cut-Tex[®] PRO

Cut-Tex[®] PRO is an ultra-high performance cut, bite and slash resistant fabric, comfortable to wear, fully machine washable and of truly exceptional strength and durability - making it the ideal material for SlashPRO[®] Slash Resistant Clothing.

As you can see below, Cut-Tex[®] PRO performs very highly in all cut, abrasion, tear and puncture tests:

Cut-Tex[®] PRO Performance Chart

➤ **Cut Resistance - ANSI/ISEA 105-2016 Blade Cut Resistance Levels A1-A9**

➤ **Cut Resistance - EN ISO 13997 (TDM-100 Test)**

➤ **Tear Resistance - EN 388:2016 Tear Resistance Levels 1-4**

➤ **Puncture Resistance - EN 388:2016 Puncture Resistance Levels 1-4**

➤ **Abrasion Resistance - EN 388:2016 Abrasion Resistance Levels 1-4**

SlashPRO® Slash Resistant Harrington Jacket

Experience discreet protection with SlashPRO® Slash Resistant Harrington Jacket. Manufactured using Cut-Tex® PRO fabric and high performance laminated breathable Polyester offering absolutely outstanding, tested and certified levels of cut, abrasion and tear resistance.

Model #: 100123/BLK

Features and Benefits

- Garment fully lined with Cut-Tex® PRO providing excellent cut and slash resistance
- Zipped Breast Pocket and 2 additional Zipped Side Pockets
- Detachable Zip Hood
- Shower Resistant
- Breathable Polyester
- 100% latex free
